

Dear Parent/Carer

There has been a case of chicken pox in your child's class. Please watch your child for any rashes that may appear on their body. The rash appears to be small water blisters. Your child may have a fever or stomach ache for the few days before the rash appears.

Your child needs to remain home until all the blisters are crusted over (they are contagious until that time).

However, if you have any concerns please seek medical advice.

Thank you for your co-operation.

Kind Regards
WPS
