

### 'Sticky' Knowledge

Rainforests are thick, warm and wet forests, full of tall trees. The world's rainforests are found on the equator, where there is a lot of rain and the sunlight is directly overhead.

A rainforest is made up of many different layers. – Emergent, canopy, understory and forest floor

Toucan

They are known for their large, brightly, coloured bills(beaks) which are used to scare away predators.

Jaguar

They live alone and hunt at night for their food.

Orangutan

Their feet and hands are hook-shaped so that they can climb.

Sloth

The two-toed sloth is a very slow-moving creature that spends most of its time hanging upside down.

Tiger

Tigers are excellent swimmers.

Tapir

They can run very fast over short distances.
