Maths Lesson Day 3 –

Converting improper fractions to mixed numbers

Complete the worksheet for today's lesson.

Again, this does not need to be printed out- answers can be written on paper.

Top Tip: Draw and cut out bar models like the examples below to help and where possible, convert your fractions so that they have the same denominator as this will help you.

E.G- 3/5 and 8/10 now becomes 6/10 and 8/10 which is easier to compare.
