

'Sticky' Knowledge

Winter is one of the 4 Seasons

Most trees are bare - no leaves.

Some trees keep their leaves - 'Evergreens'

Some animals hibernate - deep sleep

Some birds spend the Winter in warmer country - migrating.

The weather is much colder and it can snow (tiny crystals of ice) or sleet (mixture of snow and rain). We sometimes have a frost (small white ice crystals form on the ground or other surfaces when the temperature falls below freezing).
